Academic Year: 2026-27

Poster Presentation: Research Paper Based Poster Presentation on Physical and Mechanical Properties of Cement

Course Code/Name: 2093116/BMCT

Year/Sem: SE/ III

Date: 31/08/2026

Course Outcome: 2093116.1 Determine the physical & mechanical properties of cement through standard laboratory tests.

Task	BL
Form groups of 4–5 students. Each group shall select one peer-reviewed research paper related to the physical or mechanical properties of cement. Based on the selected research paper, the group shall prepare and present an A3/A2-size academic poster explaining how the cement properties were determined through laboratory testing and what the research findings indicate. Poster Requirements The poster should briefly present the selected research paper, including its title, authors, journal, publication year, and DOI/reference. It should explain the research problem and its significance, followed by the cement property/test investigated, its purpose, and the relevant IS Code. The experimental methodology should summarize the materials, cement type, test procedure, mix proportions, and curing conditions, wherever applicable. The poster should present the key results using suitable graphs, tables, or charts and provide a brief interpretation of the findings, including comparison with relevant standards. The group should also explain the engineering applications of the findings in terms of cement selection, strength, workability, setting, durability, or other relevant construction aspects. Finally, include 3–5 key findings, a group conclusion, and references to the research paper, relevant IS Codes, and other sources used.	Apply

Presentation

- **Group presentation:** 8–10 minutes
- **Question-answer:** 2–3 minutes
- Each member should explain their assigned section.
- Faculty may ask questions to **any member** of the group.

Evaluation

Performance Indicator	Max. Marks	Marks Obtained
Research Paper Analysis	2	
Laboratory Test & Technical Interpretation	2	
Application of Findings	2	
Poster Quality & Organization	2	
Group Presentation & Q&A	2	
Total	10	

Performance Indicator	Exceed Expectations (EE) (2 marks)	Meet Expectations (ME) (1 marks)	Below Expectations (BE) (0 marks)
Research Paper Analysis	Thorough understanding and effective analysis of the selected research paper	Adequate understanding with minor gaps	Limited understanding of the paper
Laboratory Test & Technical Interpretation	Correctly explains test method, results and significance	Explains test and results satisfactorily	Major gaps/errors in test or result interpretation
Application of Findings	Clearly connects research findings with cement/concrete performance	Makes a reasonable connection with practical application	Application is unclear or incorrect
Poster Quality & Organization	Well-structured, technically informative and visually effective	Clear and adequately organized	Poorly organized or difficult to understand
Group Presentation & Q&A	All members contribute effectively and answer questions accurately	Most members contribute and answer basic questions	Unequal participation and difficulty answering questions
